

Gilmore Furniture Conference Tables

Inlays

Attention to detail and subtle design are hallmarks of Gilmore's craftsmanship, inlaid designs, patterns and decorations composed of woods, stones, or metals add subtle distinction to surfaces and edges. Select from one of the many patterns shown here or let your imagination spring to life in the hands of our designers.

Marquetry

Shown above is the 18" x 24" portrait of Abraham Lincoln that is the centerpiece of Lincoln National Insurance Company's 32' x 7' conference table. Over 300 pieces of veneer were used to complete it using the latest technology. Computer-aided design and laser aligned cutting machinery make it possible for Gilmore to execute detailed motifs down to the smallest element. This high tech process is partnered with our experienced craftsmen who carefully select each material used, paying strict attention to color, shadings, tones and variations. Each piece is then carefully hand-placed into the pattern, then the entire arrangement is inlaid on the surface.

No Single piece of furniture represents your style, image, and integrity as a does your conference table. Shown above is the pride of Lincoln National Insurance Company, an impressive 32' x 7' conference table that seats 18.
